PROFESSIONAL SUMMARY

Accomplished Senior Full Stack Developer with 11 years of experience specializing in high-scale financial, health and enterprise applications. Expert in building core libraries and architecting responsive and high-performance user interfaces UIs.

SKILLS

- Angular 16+
- AngularJS
- ReactJS
- JAVA Springboot
- Node JS
- Material.io, Bootstrap, FlexBox
- Jenkins
- Testing and debugging - Karma & Jasmine, Jest
- Github Action
- Docker / AWS
- NgRx - RxJS

WORK HISTORY

SENIOR LEAD DEVELOPER

09/2025 to PRESENT

Kaiser Permanente | Frisco, Texas

- Architecting a high-performance web dashboard from the ground up using React and NodeJS, establishing core libraries to manage complex insurance payer data and medical records
- Developing and maintaining automated deployment pipelines using Jenkins and GitHub Actions to manage Docker containers and Kubernetes orchestration, ensuring high availability for critical data services
- Engineering secure backend services using Java Spring Boot and Node.js to handle intricate data relationships and real-time updates for insurance and payer information.
- Optimizing frontend performance through SCSS and Flexbox for responsive interfaces, while performing system tuning and static code analysis via SonarQube
- Leading technical design sessions and code reviews within an Agile framework

SENIOR SOFTWARE DEVELOPER

09/2024 to 09/2025

Kaiser Permanente | Pleasanton, California

- Enhance the Planning Web Application, transitioning from Excel-based staff planning to a scalable, user-friendly web tool.
- Developed full-stack features using **ReactJS** for the frontend, and **Node.js** and **Java** for the backend services.
- Integrated **Jenkins** pipelines for automated CI/CD deployments, improving release efficiency and reducing deployment errors.
- Monitored application performance and behavior using **Splunk**, identifying and resolving key bottlenecks and runtime issues.

- Used **SonarQube** to perform static code analysis, ensuring code quality, maintainability, and adherence to best practices.
- Acted as a senior team member, regularly conducting **code reviews**, helping developers, and debugging sessions to resolve technical challenges.
- Collaborated with cross-functional teams including QA, Product, and UX to ensure features met business and usability requirements.

LEAD SOFTWARE DEVELOPER

09/2023 to 08/2024

Kaiser Permanente | Pleasanton, California

- Partner with Kaiser Permanent to provide support and develop on their Technology Risk Office (TRO)
- Optimized resource allocation across multiple concurrent projects by closely tracking team capacity levels against project deadlines and milestones.
- Tested and deployed scalable and highly available software products.
- Perform code reviews for standards and quality assurance
- Usage of JAVA for backend API development and Typescript for frontend development across the application.
- Deploy software using AWS technologies, as well as Jenkins for CI/CD.

LEAD SOFTWARE DEVELOPER

10/2022 to 09/2023

Kaiser Permanente | Pleasanton, California

- Partner with Kaiser Permanent to upgrade their application to most up-to-date technologies
 - Upgrading KP eConsult software from AngularJS to Angular 11
 - Contributed to company-wide design sprints as subject matter expert on UI development principles.
 - Vastly usage of typescript for front-end development, as same as JAVA/Springboot for backend API development.
 - Perform code reviews for standards, quality assurance, and security audit purposes.
 - Conducted thorough usability testing to identify areas for improvement, resulting in more effective interfaces.
 - Worked closely with UX and product teams to define visual and functional requirements.
 - Usage of AWS technologies for deployment and management of the application.

SR FRONT END DEVELOPER

01/2021 to 08/2022

Indus Software Solutions Inc | Pleasanton, California

- Partner with JPMorgan Chase & Co to develop and improve its web dashboard
- Deliver fully functional new dashboard implementation for internal purpose of their data visualization
- Successfully identified, diagnosed, and fixed software problems
- Advocated for well-tested and documented, high quality code.

- Perform code reviews for standards, quality assurance, and security audit purposes
- Improved tools to boost user interaction and deliver design versatility.
- Work closely with backend team to perform frontend-backend integrations
- Followed SDLC best practices within Agile environment to produce rapid iterations for clients.
- Using tools like: Angular 10, React, JAVA, Karma/Jasmine Testing, Typescript, Jules, Github, RxJS, SCRUM

SOFTWARE DEVELOPER

01/2016 to 10/2020

Spectrum Effect | Monterrey, Mexico

- Develop new tool that provide highly innovative RF interference mitigation capabilities enabling mobile operators to rapidly resolve interference issues, improve network KPIs
- Effectively coded software changes and alterations based on specific design specifications
- Worked to solve complex problems using latest in Web Technologies
- Developed software for desktop and mobile operating systems.
- Use of Leaflet, Google Maps libraries to integrate them on UI
- Partner up with world-wide carriers to use their data in our application like T-Mobile, Verizon, AT&T
- Using tools like: Angular 8, React, NodeJS, Python, Maps APIs integration, Karma testing, Docker, JAVA, Startup experience.
- Collaborated with cross-functional teams to deliver high-quality products on tight deadlines.

WEB DEVELOPER

08/2015 to 12/2015

Viallogic | Tampico, Mexico

- Work together with team on improvement and development of website of company and also perform support and maintenance of application
- Established version control processes to facilitate collaborative development efforts among team members.
- Enhanced user experience by implementing responsive web design and optimizing website performance.
- Tools: JavaScript, HTML, jQuery, Drupal.

JR WEB DEVELOPER

01/2013 to 08/2015

Gelattina | Tampico, Mexico

- Partner with "Gelattina Agencia Digital" in the development of site for the company Seminis USA
- Provided end-to-end assessment and planning of overall web experience and tool interactions, usability and content organization
- Took concepts and produced design mockups and prototypes to strengthen designs, enhance user experiences and improve site interactions.
- Extensively Implemented user interface designs from UI specifications and product requirements.

- Performed unit testing of web applications and troubleshoot issues.

EDUCATION

○ **Bachelor | Information Technologies** *12/2015*
Instituto Tecnológico Y De Estudios Superiores De Monterrey (ITESM),
Tampico, Mexico

○ **Computer Science** *12/2014*
Nipissing University, North Bay, Ontario

○ **Entrepreneurship summer program** *08/2013*
McGill University, Montreal, Quebec
